

Looking Good in Nevada

SurgiSpa is devoted to giving every patient a positive experience, from initial consultation to final result.

Art Cambeiro, MD and a dedicated staff emphasize three main objectives:

- *To provide the most current, safe and effective procedures along with patient education. Your concerns and questions are their top priority.*
- *To provide an environment where compassion, knowledge and expertise result in personalized quality patient care. They strive to surpass your expectations.*
- *To achieve your desired results. Predictable and natural-looking outcomes are delivered using proven, effective surgical techniques.*

Dr. Cambeiro is a skilled practitioner of endoscopic breast augmentation (Endo Aug), the perfect solution for most women who desire breast enlargement. The Endo Aug conceals any scarring away from the breasts, improves recovery and may shorten recovery time, and can even lessen the chance of post-surgical complications. During your initial consultation, Dr. Cambeiro will determine your expectations and help you to choose the proper implant along with its size and placement. He'll review your medical history and evaluate your body to make sure that this procedure is right for you, and will explain every step of the endoscopic breast augmentation process. An endoscope is a tiny, lighted camera, about the size of a pencil, allowing the surgeon to perform this procedure through a tiny incision made in the natural crease of the armpit. The endoscope and surgical tools are inserted into the breast implant site; the endoscope then displays the surgical site on a monitor. In this way, Dr. Cambeiro can see the exact boundaries of the breast implant pocket, allowing him to place the implant more precisely and lessen the chance of post-surgical complications. Recovery from the endoscopic procedure may be shorter than recovery from traditional breast enlargement, and if any scarring should occur it will be concealed away from the breast. Nearly all of your regular activities can be resumed after a week or two. Dr. Cambeiro also performs standard breast augmentations and uses state-of-the-art technology for all of his procedures.

Dr. Art Cambeiro is a native of Las Vegas who has trained at the Mayo Clinic; he is a member of the American Society of Plastic Surgeons, certified by the American Board of Surgery and the American Board of Plastic Surgery. In addition to his extensive formal education, he has performed missionary work as a surgeon in Honduras at local medical clinics. Through Global Health Outreach, he has donated his surgical skills to correct congenital facial defects of children in Vietnam. Dr. Cambeiro and SurgiSpa offer a full range of cosmetic procedures, from facial rejuvenation to body contouring to skin care.
